

## Manage critical infrastructure remotely – Sierra Wireless RV55 offer

Recent working-from-home guidelines demand an urgent requirement for solutions that reduce the need for field visits to industrial applications.

The Sierra Wireless AirLink RV55 is an LTE-Advanced Pro router that enables seamless remote management of critical infrastructure. It is designed to deliver superior connectivity in harsh and remote environments, making it ideal for applications in the energy, utilities, smart city, and public safety sectors.

The RV55 offers the following:

- Downlink speeds of up to 600Mbps, and up to 150Mbps uplink.
- IP64 rating.
- Low power consumption.
- Versatile event monitoring and reporting engine.
- Modbus master over serial or Ethernet provides connectivity to existing industrial process control and monitoring systems.
- Free support in year one\*.

\*Support is free in year one with an AirLink Complete subscription.

**Linkwave Technologies is offering the RV55 at a special promotional price.**
